TRIBE

On-wall series

TRIBE

There are three Tribe models: Tribe I, Tribe II, and Tribe III. Of different size, each model is luxuriously detailed and perfectly proportioned, being among the slimmest wall speakers available. As with all Totem products, the Tribes are not only sonically superb but technologically cutting edge: The neodymium-activated, long-throw woofers were designed for speed, clarity, and astounding bass extension. The superb, long-throw, soft dome tweeter seamlessly interacts with these woofers to fashion not only a wall of sound, but also a facade of subtle, rich harmonics woven into wonderful sonic holography.

The internal crossover system is of the highest calibre. Hand-assembled and hardwired, each Tribe's crossover involves few elements because of driver blend. Each model incorporates revolutionary and state-of-the-art Mundorf® Supreme Gold/Silver foil capacitors in its crossover. Each model benefits from a flush wall-mounting system and an intelligent neodymium-magnetized grill attachment. All Tribe models, regardless of application, offer a glamorous and discrete path to dimensionally extravagant and accurate sound reproduction.

All Tribe models are designed to match any application or flat panel display.

A series
of on-wall
speakers
from
Totem
Acoustic

Features

- Exclusively-designed, ultra-quick, frequency-extended, neodymium-activated woofers.
- Long-throw, hyper-extended, 29 mm soft dome tweeter.
- Aesthetic, acoustic finishes.
- Twin pairs of gold-plated terminals.
- No-compromise internal wiring and extreme crossover parts including Mundorf® Supreme Gold/Silver foil capacitors.
- Sturdy, ultra-flush wall-mounting system.
- Magnetically activated grill-clamping system.

Tribe III incorporates the revolutionary Totem-patented "Torrent" extreme performance woofer.

Available in black
and grey finishes

Totem Acoustic's series of on-wall speakers is designed to offer the highest calibre, full-range performance for all on-wall applications.
